

# ASIA (SOUTHEAST ASIA, INDIA, KOREA AND JAPAN)

---

ZSI has a long-lasting track record in research policy projects with Southeast Asia, the Republic of India, Korea and Japan. We conduct activities in these regions mainly for the European Commission but we have also supported Austrian and Southeast Asian policy bodies in their Asia-related science, technology and innovation activities.

In cooperation with stakeholders across the world, ZSI delivers substantial and comprehensive policy analysis. We also scrutinise cooperation networks (through bibliometric methods, patent analyses and analysis of funding instruments) and channel findings into ongoing policy processes. At the level of research and innovation funding, we have experiences in designing and implementing bi-regional research funding instruments (including monitoring & evaluation, programme management, etc.).

## WE OFFER

---

- Scientific expert advice for policy, based on our analytical work on science, technology and innovation policies, programmes and cooperation
- In-depth understanding of the Asian research and innovation (R&I) systems through qualitative and quantitative innovation systems analysis, bibliometrics, altmetrics, patent analyses, foresight, etc.
- Development of project and programme monitoring and evaluation systems
- Liason of researchers and research programmes in EU partner countries with the partner region
- Design and organisation of matchmaking events
- Organisation of targeted activities to engage different R&I stakeholders in international cooperation
- Coordination and management of international R&I partnership projects
- A strong network of partners from ministries responsible for research and innovation to funding agencies and research performers in the partner countries

# OUR REFERENCES

- **INDIGO POLICY**, a bilateral project to support the science, technology and innovation (STI) policy dialogue between the EU and India, coordinated by ZSI
- **SEA-EU-NET** and its successor **SEA-EU-NET II** (EU-ASEAN S&T cooperation to jointly tackle societal challenges), with ZSI leading the analytical activities
- **ERA.NETs**: with India - **INNO INDIGO** and its predecessor **New INDIGO** as well as Korea – **KORANET**. ZSI leads work packages on monitoring, evaluation and foresight, as well as communication and dissemination
- **EqUIP** (EU-India Platform for the Social Sciences and Humanities): ZSI supports the preparation of a roadmap for future joint Indo-European Social Sciences and Humanities funding
- **JEUPISTE**, the Japan-EU Partnership in Innovation, Science and Technology, with ZSI in charge of bibliometric analyses of EU-Japan academic co-publications
- **SUSTAIN EU-ASEAN**, a project to support the networking of environment research communities in Southeast Asia and Europe
- Expert advice to **READI**, the **Regional EU-ASEAN Dialogue Instrument**, to facilitate ASEAN regional integration and policy dialogue in the area of science and technology
- Expert advice to the GIZ-funded project **„Promoting Innovation & Technology in ASEAN countries“**
