

**Support for the advancement of policy cooperation
between India and Europe in Research and
Innovation**

**INDIGO POLICY linking programme on
biotechnology in the field of health**

CALL TEXT

Proposal Submission Period:

24 July 2014 to 29 September 2014 (12:00 CET / 15:30 IST)

Contact:

INDIGO POLICY Call Secretariat

Centre National de la Recherche Scientifique (CNRS)

Ms. Audrey Gahéry

E-mail: audrey.gahery@cnrs-dir.fr

Phone: +33 1 44 96 51 53

Fax: +33 1 44 96 48 56

This Project is funded by the European Commission under the Seventh Framework Programme
Grant Agreement: 609535

TABLE OF CONTENT

1. Background and objectives of the INDIGO POLICY Linking Programme

- 1.1 INDIGO POLICY project
- 1.2 Objective of the INDIGO POLICY linking programme
- 1.3 Objective of the future Multilateral Virtual Laboratories
- 1.4 The thematic area: biotechnology in the field of health

2. Eligibility criteria for funding recipients

- 2.1 Applicants
- 2.2 Composition of the consortia

3. Funding Modalities

- 3.1 Funding framework
- 3.2 Duration of the funding
- 3.3 Eligible costs

4. Application procedure

5. Eligibility check and evaluation

6. Project output and acknowledgements

7. Legal clauses

8. Indicative calendar

Annex 1: Daily flat rates for subsistence costs per country

1. Background and objectives of the INDIGO POLICY Linking Programme

1.1 INDIGO POLICY project

INDIGO POLICY is a BILAT funded by the European Commission under the Seventh Framework Programme (November 2013- October 2016). The overall objective is to support the policy dialogue and enhance Science, Technology and Innovation (STI) cooperation between Europe and India.

INDIGO POLICY is, together with INNO INDIGO (ERA-NET) the successor of New INDIGO (2009 – 2013), which implemented 4 multilateral calls for proposals. 35 projects were therefore funded within the framework of NEW INDIGO by European and Indian national funding agencies.

The key aims of INDIGO POLICY are to:

- Support the EU-India policy dialogue within the SFIC (Strategic Forum for International Cooperation) framework
- Foster EU-India STI cooperation
- Structure the network of stakeholders involved in EU-India cooperation
- Associate innovation players (clusters, SMEs, industries, etc) in the EU-India cooperation

The consortium is coordinated by ZSI (Zentrum für Soziale Innovation - Austria) and consists of organisations from 6 countries (Austria, France, Germany, India, Italy & the Netherlands).

For further information on the project activities, you are invited to consult our website: <http://indigoprojects.eu/>.

1.2 Objective of the INDIGO POLICY Linking Programme

The main aim of INDIGO POLICY Linking Programme is to support the establishment of multilateral virtual laboratories, involving minimum 2 European and 1 Indian research teams to establish a sustainable cooperation.

This programme is mainly designed for:

- already existing cooperation between 2 European teams who wish to extend their activities with an Indian team
- already existing bilateral cooperation between a European team and an Indian team who wish to extend their activities with a European team
- informal multilateral cooperation involving minimum 2 European and 1 Indian teams willing to formalise their cooperation

The final purpose of the INDIGO POLICY Linking Programme is to **showcase good practices** of existing multilateral virtual laboratories and to **promote cooperation tools** such as CNRS International Associated Laboratory, international laboratories “without walls” (<http://www.cnrs.fr/en/workingwith/LIA.htm>).

The selected project will be the opening of a bilateral cooperation to a new partner or a formalisation of an informal multilateral network, proposing a complementary cooperation. It should bring a clear added value to the current collaboration. INDIGO POLICY will fund mobility for preparatory meetings to lay the foundation of the multilateral virtual laboratory. The projects partners will afterwards use national funding and national cooperation tools to set up the practical cooperation on the long run.

Particularity of INDIGO POLICY Linking Programme: Funding in 2 phases

Phase 1:

The selected projects will be financially supported by **INDIGO POLICY**. Seed grants of up to 30 000 euros will be provided during 18 months to set up the multilateral virtual laboratories.

Besides, assistance will be given by INDIGO POLICY to the selected projects to help them to secure the funding of the second phase.

Phase 2: **Partners will assure the continuity of the project funding.** Collaboration activities will therefore continue from the financial support for their respective national/regional funding agencies.

1.3 Objective of the future Multilateral Virtual Laboratories

The selected multilateral cooperation will be an association of laboratories wanting to join their forces on specific topics. Mobility activities (preparatory meetings and their related costs, e.g. travel costs, workshop costs, etc.) to set-up a virtual multilateral laboratory, will be funded by INDIGO POLICY whereas each partner will be responsible for their own project funding, their own facilities, and their own workforce. In the virtual multilateral laboratory, project partners will share human and material resources to implement the projects. They will however keep their autonomy, their status and their separated location.

1.4 The thematic area: biotechnology in the field of health

Multilateral laboratories will be financially supported in **biotechnology in the field of health**. The thematic area was defined in accordance with the ongoing EU/MS-India Group of Senior Officials (GSO) process to develop a common Strategic Research and Innovation Agenda (SRIA). The

thematic area of the call is a research field of mutual interest and thematic priority with high research potential in Europe and India.

2. Eligibility criteria for funding recipients

2.1 Legal status of the applicants

Partners can be public research labs (university or non-university). Participation of small and medium enterprises (SMEs) and industries are strongly encouraged but they are not eligible for funding.

2.2 Composition of the consortia

Each project consortium should consist of at least 3 laboratories, one Indian partner and two European partners. The European partners can be from European Union Member States (EU MS) and Associated Countries (AC). The European partners must not be from the same European countries.

Each project consortium has to choose one **project coordinator**, who will formally submit the proposal. The coordinator will also be responsible for communication with the Call Secretariat. If the project is selected, the coordinator will implement the network, the communication and coordination with the Call Secretariat. It is highly recommended to appoint a European partner as coordinator to facilitate the administrative and financial management (payment and procedures).

3. Funding Modalities

3.1 Funding framework

Prior to the starting date, a **financing agreement** will be signed between CNRS, on behalf of INDIGO POLICY and the **coordinator's organisation**, on behalf of the consortium.

Each consortium will receive **up to 30,000 euros** from CNRS on behalf of INDIGO POLICY according to the following procedure:

1- The project will be divided in **3 financial reporting periods** (Months 6, 12 & 18). For each of this reporting period, the coordinator will present the evidences (supporting documents) for mobility (travel order and invoices) and workshop costs incurred within the framework of the project.

2- **CNRS will proceed to the reimbursement of the eligible costs** on Months 6, 12 & 18 after the

validation of supporting documents sent by the project coordinator (travel order, invoices, and other supporting documents) to CNRS. **The payment will be made by CNRS to the project coordinator.**

IMPORTANT: The coordinator of the consortium will be responsible for the whole procedure, i.e.:

- to collect all evidences (supporting documents) for costs incurred
- to send them to CNRS within the deadlines defined in the financial agreement
- to redistribute the funding received among the different partners who have incurred expenses within the framework of the project

Besides, DBT (Department of Biotechnology) India might provide additional travel and contingency budget to Indian participants on a case by case basis. Please contact Dr. Shailja V. Gupta (shailja.dbt@nic.in) for further information.

3.2 Duration of the Funding

INDIGO POLICY Linking Programme will fund networking projects for a duration of **18 months** following a proposed starting date of 1 January 2015. **The final scientific report is due on 31 September 2016 as INDIGO POLICY is ending on 31 October 2016.**

3.3 Eligible costs

INDIGO POLICY will fund **mobility activities and the organisation of workshops** under the financial regulation of CNRS of the **members of the consortium and possible external experts, whose names are mentioned in the proposal.** Mobility activities include exchange visits within Europe and between Europe and India. Costs should be reported **in Euros**¹. Estimation of eligible costs must be shown in details in the provisional budget for the phase 1.

Eligible costs are:

- Subsistence costs: (accommodation and meals) and on the basis of CNRS flat rates²

¹ If a conversion for another currency has to be made the basis of the exchange rate would have to be applied is the following:

- on the date the actual costs were incurred

OR

- on the basis of the rate applicable on the first day of the month following the end of the reporting period.

For both options, the daily exchange rates are fixed by the European Central Bank (ECB), see:

<http://www.ecb.int/stats/eurofxref/>

² Please refer to Annex 1

- Other direct costs: they will need to be justified on a real cost basis

They include travel costs, visa costs and workshop costs (catering, rent for the event location, etc for joint events) for meeting including partners of the consortium and possible experts.

ATTENTION: Travel and related subsistence costs must be needed for the work in the project. Any extension of the travel for other professional or private reasons is not an eligible cost.

Non eligible costs include:

- personnel costs
- The purchase costs of durable equipment.
- Administrative costs

ATTENTION: All the costs must be incurred within INDIGO POLICY period of funding (18 month duration, following a proposed starting date of January 1st, 2015) and for the purpose of the project to be eligible.

4. Application procedure

Only applications using the **attached application form** will be accepted. The project coordinator will formally submit the proposal on behalf of the consortium. Proposal submitted after the **deadline – 29 September 2014 – and uncompleted applications** will not be considered in the evaluation. It is highly recommended not to submit the proposals at the last minute.

The following documents are additionally requested:

- Information on each involved institution and the researchers (including CV) – 1 page max. per institution
- Description of the existing bilateral cooperation /Publication/patents already in common
- Scientific Program (3-5 pages)
- Provisional project budget for the phase 1 (January 2015 – July 2016) and for the phase 2, including the provisional source of funding (2016-2018)
- Program of planned activities with name of travelers, institutions and schedule dates – 1 page max.

The applications have to be sent in English electronically to linkingprogramme@indigoprojects.eu.

5. Eligibility check and Evaluation

The eligibility of the submitted project will be formally checked by the call Secretariat against the following criteria:

- composition of the consortium (2+1)
- thematic scope
- level of funding requested

Eligible applications will be then evaluated by high-level scientific experts in biotechnology in the field of health according to the following criteria:

- Scientific quality
 - Relevance of the topic and of the objectives
 - Quality and excellence of the applicant
 - Organization and project coordination
 - Existence of common publications
- Added value of the partnership
 - Collective expertise and complementarity of labs
 - Participation of doctoral student and/or junior researchers
- Sustainability of the project (provisional budget for the Phase 2)

6. Project output and Acknowledgements

Every project is requested to draft an intermediate and a final report to ensure the maximum output. The reports have to be sent to the Call secretariat and will be published on the INDIGO POLICY website.³

7. Legal Clause

As specified in the funding modalities (prior to the starting date), a financing agreement will be signed between CNRS, on behalf of INDIGO POLICY and the coordinator's organisation, on behalf of the consortium.

CNRS will however not be responsible for redistribution & internal management. It is therefore highly recommended that **project partners of each consortium sign a Consortium Agreement** to define the consortium rules such as the distribution of financial contributions' rules, the internal management, terms of confidentiality, Intellectual Property Rights, etc.

³ No confidential information will be published

8. Indicative calendar

Publication of the Call for Proposals	24th July 2014
Deadline of submission phase	29th September 2014 12:00 Central European Time 15:30 Standard Indian Time
Notification to applicants of funding decision	1st December 2014
Start of projects	1st January 2015
Mid-term report	November 2015
Final report	September 2016
