

SEA-EU-NET 2 has been set up to expand scientific collaboration between Europe and Southeast Asia (SEA) in a more strategic and coherent manner. The four-year long project involves 21 institutions from the two regions and is deepening collaboration by: Intensifying the bi-regional dialogue between EU and SEA S&T policy makers; jointly tackling societal challenges in the fields of health, food security and safety, metrology, and water management; increasing the level of SEA participation in Horizon 2020; analysing in detail the current state of EU-SEA S&T relations; and extending the dialogue on EU-SEA S&T co-operation to include a wide range of stakeholders.

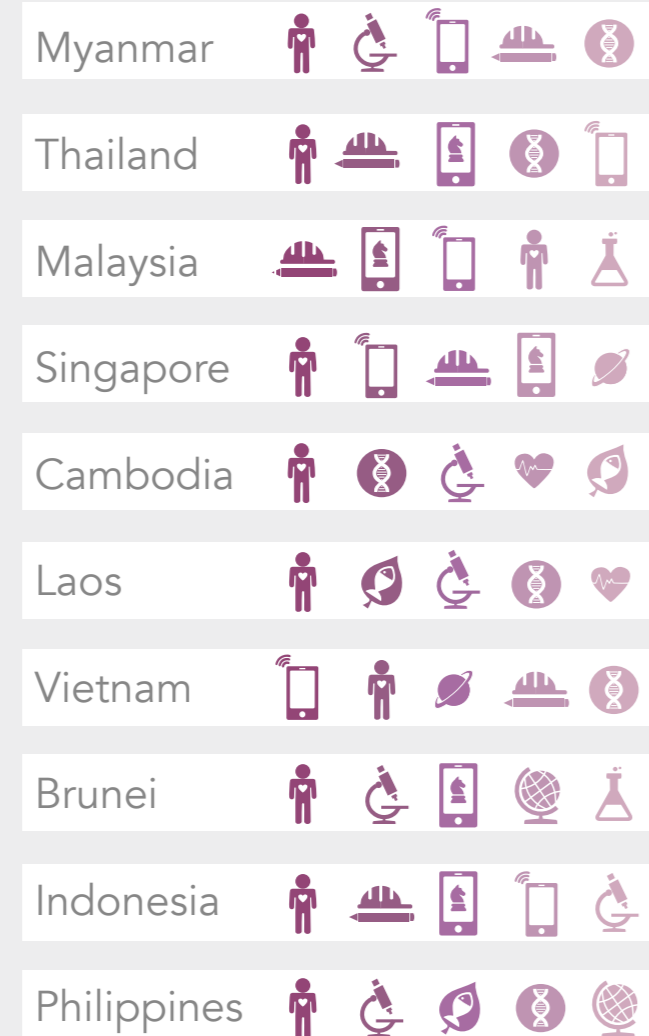

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no 311784
