

Made in Danube: Bioeconomy a key element for smart and green growth in Europe and the Danube Region

Made in Danube at a glance

Within the Made in Danube consortium, we truly believe in the economic strength and potential of the Danube Region and at the same time share the vision to overcome cultural, economic and ecological impediments with joint forces.

One of the main territorial challenges concerns the low competitiveness of SMEs - often caused by the lack of innovation capacities of involved actors. The Made in Danube project responds to this challenge using a three-fold approach: it will develop a common strategy to transform ideas into marketable products and services which shall facilitate the conversion of knowledge into innovative solutions. It will create tools and services to facilitate the process of developing collaborative projects. It supports good practices exchange in the area of innovation and technology transfer linked to bioeconomy.

Project Progress

After 18 months of the implementation, Made in Danube succeeded to attain apparent outcomes leading to the achievement of the main project results in order to support & facilitate Innovation & Technology Transfer (I&TT) in the Danube Region by building sustainable Innovation partnerships, comprising SMEs to collaborate with RTOs and developing a Common strategy to transform marketable products & services into the market in the field of Bio-economy. In recent months, our work has continued on the analysis and associated improvement of the framework conditions. One result is the roadmap aiming to improve the framework conditions for I&TT in the field of Bio-economy.

The roadmap follows a bottom-up approach and includes recommendations deriving directly from our stakeholders as the document is based on the assessment of 208 preformed interviews and on 3 developed Local Action Plans, supporting 3 existing Local initiatives in Slovakia, Croatia & Serbia. Furthermore, 3 Best Practice Workshops have been organized during the last period aiming to exchange in the different domains, such as social, service & eco-innovation, attaining in this way on-the-spot information from the relevant actors. Significant attention has also been given to the implementation start of Innovation capacity tools (TO/TR/IA) in order to systematically analyse innovation capacities of the targeted stakeholders in the Danube region and simultaneously prepare the ground for the upcoming activities - organisation of Brokerage events & matching the suitable actors for collaborations in the field of Bio-economy. For this reason, our Danube Transfer Innovation Cooperation e-tool platform, has further been upgraded with two new e-Modules and capacity building activities for the relevant actors in the form of trainings on the topics relevant for the I&TT have also been performed.

Beside all activities leading to the implementation of 3 LAPs, Made in Danube partners also continued in preparing a foundation for the establishment of Bio-economy network & for providing Policy recommendations.

First Policy Dialogue and EUSDR PAs' Cross-fertilisation Workshop, Zagreb, Croatia, 26 September 2018

The theme of the Workshop was: Competitiveness and Innovation for Long-lasting Transnational Collaboration in the Danube Region's Bio-economy field.

The planned objective: to allow representatives of EUSDR Priority Areas as well as public authorities to meet and exchange information on updates and implementation of own planned actions so as to find out possible synergies as well as further cooperation approaches within the broader EUSDR framework. The workshop opened policy dialogue for future opportunities of collaboration among the priority areas with particular focus on bio-economy.

The Workshop was organized by Made in Danube project with the support of Croatian Ministry of Economy, Entrepreneurship and Crafts (PA8 co-coordinator) and Ministry of Regional Development and EU funds, as cross-fertilization and fruitful dialogue between the following Danube Strategy Priority Areas: PA2 (Sustainable Energy), PA4 (Water Quality), PA6 (Bio Diversity and Landscapes, PA7 (Knowledge Society), PA8 (Competitiveness of Enterprises) and PA9 (People and Skills).

Capitalization Event Pole1, Pole 2, Pole 3, Budapest, Hungary, 28 September

In frame of the INTERREG DTP SENSES project Summer School on Social Innovation in Budapest and in association with the SIC Social Innovation Community project (supported by the European Commission's H2020 programme) an extra day of the Summer School, approved INTERREG Danube Programme projects, took place aiming to introduce, valorise and further build upon the knowledge resulting from projects working in a thematic fields for the overall implementation of the DTP Capitalisation Strategy. Deeper insight into the work of Thematic Pole 1 – Innovative ecosystem for SMEs, Thematic Pole 2 – RDI Framework support and Thematic Pole 3 – Entrepreneurial Learning Systems was provided. Made in Danube as coordinator of Pole 1 took place in all sessions informing participants about the project itself and the work as coordinator. Further presentations included the lessons learned so far and how to successfully create synergies in the field of circular and bio economy.

Two business clusters were launched in Moldova with EU support, Workshop, Chisinau, 12 September 2018

Two clusters have been launched that will bring together key stakeholders – businesses, public authorities, universities to develop regional industries and bring added-value for entrepreneurs.

The generation of the two clusters was initiated by the Organisation for Small and Medium Enterprises Sector Development – ODIMM, Made in Danube associated partner, with the support of EU Technical Assistance and Information Exchange Instrument (TAIEX). The progress was achieved with the support of TAIEX experts: that analysed national context, developed the cluster methodology and facilitated the creation of the two pilot initiatives.

The results were presented during a special workshop on cluster policy and support for cluster initiatives on September 12th 2018. The event was a valuable platform for an open dialogue on new collaborative models that would accelerate economic development by revitalising key sectors and providing the necessary environment for research, innovation and regional development.

7th Annual Forum of the EUSDR, Sofia, Bulgaria, 18-19 October 2018

The Annual Forum will cover topics of particular importance for the Danube region related to preservation of cultural and historical heritage, new technologies and digitalization in tourism and bioeconomy sector, ensuring safety and security in tourism, bioeconomy, transport connectivity and mobility.

Issues related to synergy and consistency between macro-regional strategies for achieving the common objectives of the EU and for the future of those strategies after 2020 also was referred to. Two parallel thematic sessions on sustainable tourism mobility and security in public spaces and an open-air exhibition will be scheduled as well. During the Forum Made in Danube will participate as an INTERREG DTP exhibitor aiming to disseminate DTP project achievements in the field of bioeconomy as well as some of the outcomes already achieved in Thematic pole 1.

Synergies with others projects

Sinergy with BIOWAYS and BIOVOICES projects

One member of **Bioeconomy Cluster** in Slovakia, member of Made in Danube consortium, is a project partner in 2 projects within BBI-JU programme under H2020 – the **BIOWAYS** and the **BIOVOICES**. Within the project BIOWAYS, the consortium has developed two documents “*Bio-based products and applications potential*” and “*Public perception of bio-based products*”. Within the project BIOVOICES, the consortium has developed document “*Stakeholders’ classification*”.

Workshop Sustainable and Circular Bioeconomy in Slovakia, Nitra, Slovakia, 22 October 2018

The workshop in Slovakia will be the official “side event” of the main Bioeconomy Conference, which will be held in parallel in Brussels, focusing on the need to have a sustainable and circular bioeconomy to enhance the transition in a changed EU policy context and towards a new environmental, social and economic reality.

Slovak Bioeconomy Cluster is one of the co-organizers of the event. The Made in Danube project partners will participate at the event and the objectives and results of the project will be disseminated there.

Transnational cooperation offers local solutions! Successfully using project results in cities and municipalities, Munich, Germany, 26th September 2018

On 26 September 2018, the Bavarian State Ministry of Finance, Regional Development and Regional Identity, in cooperation with the Baden-Württemberg Ministry of Economic Affairs, Labour and Housing, invited to the following event in Munich: Transnational cooperation offers local solutions! Successfully using project results in cities and municipalities. The workshop was aimed at those interested in the Interreg V B Danube Region and Central Europe programmes.

During the event, the objectives and building blocks of a successful regional exploitation of transnational project results were linked with your practical experience. The programme included: exhibition stands to present ongoing projects from the Interreg V B programmes Danube Region and Central Europe. The study “Using European Model Solutions - Building Blocks for a Successful Implementation of Projects on Site” was presented.

There was an interactively moderated discussion round with live surveys, real-time results on the topic *Regional utilization of project results in theory and practice*. The event ended with an outlook on the new 2021+ funding period.

Transnational Cluster Cooperation active on Agro-food, based on Smart Specialization Approach in Danube region – Danube S3 Cluster, Kick-Off event, Sinaia, Romania, 25-26 September

The project addresses the unbalanced distribution of innovation performances between Western part of the region with a high level of development and the Eastern part that is lagging behind, most of the countries belonging to the Modest Innovators group with more than 17% of enterprises producing only 3% of added value. Cluster cooperation policies based on the smart specialization concept are at the core of delivering the EUSDR strategy, as they help take the geographical/thematic context into account in order to boost growth.

At the Kick-off event participated more than 100 representatives of national/local public administration, business environment, agricultural research and development institutes, cluster representatives, chambers of commerce in the South-Muntenia

region, as well as the Danube S3 Cluster project partners. Made in Danube was presented as a partner project

Green SummerSchool, 25-28September 2018, Wien, Austria

In the framework of the Interregg Danube Transnational Programme [Ecolnn Danube](#) – Eco-innovatively connected Danube Region, *Green Summer School* was organized by the [EC Network](#) of [BOKU - Universität für Bodenkultur Wien](#), partner of Made in Danube project and Economicalnsitute of Economic research.

Ecolnn's overall aim is to boost ecoinnovation development by supporting cooperation between innovators, scientists and enterprises in the Danube Region. In this context, Made in Danube Project was introduced to the participants as an example for transnational cooperation to promote Bioeconomy in the Danube Region, followed by a brief discussion.

The *Green Summer School* was meant for everybody interested in eco-innovation – students, green startup and entrepreneurs. It provided the necessary energy for individual ambitions, accompanied by an interactive programme for introducing into the concept of eco-innovation and visits to a start-up and UNIDO. Workshops took place for idea development and rhetorics to get mature for presentations to experts.

POWER4BIO project started with the participation of 2 Made in Danube partners, SUA and BZN, 1 October 2018

POWER4BIO project - Empower in regional stakeholders for realizing the full potential of European BIOeconomy, funded by Horizon2020, aims at empowering regional stakeholders to boost the transition towards bioeconomy regions in Europe by providing them with the necessary tools, instruments and guidance to develop and implement sound sustainable bioeconomy strategies. In particular, POWER4BIO will define a methodology to guide European regions when preparing and reviewing their regional bioeconomy strategy and its associated implementation plan, and which will be ultimately integrated in a Bioregional Strategy Accelerator Toolkit.

BIOEAST conference: Bioeconomy in the forefront of national policies, Budapest, Hungary, 8 November

In the context of the Global Challenges & Paris COP21 agreement, the role of R&I and evidence based policy-making is needed more than ever. The Central-Eastern European Initiative for Knowledge-based Agriculture, Aquaculture & Forestry in the Bioeconomy (BIOEAST) offers a shared strategic research and innovation framework for working towards sustainable bioeconomies in the Central and Eastern European (CEE) countries. The conference will take place during the Science Festival *Science Festival: Science without borders* with support of Made in Danube partners.

Bioeconomy Forum

The crucial role of the bioeconomy in achieving the SDGs

The bioeconomy has a key role to play in the transition to a more circular, renewable and resource-efficient society. In order to achieve food security, meet climate and renewable energy targets, a holistic and cross-sectoral approach to foster bio-based solutions is vital. At the occasion of an [EUBA event](#) on the 'Benefits of the Bioeconomy', the Alliance published a new paper on the crucial role of the bioeconomy in achieving the UNSustainable Development Goals.

More... [Read More](#)

The circular economy and the bioeconomy

The European Environment Agency (EEA) published their third report on the circular economy in support of the framing, implementation and evaluation of European circular economy policy from an environmental perspective. The two previous EEA reports applied a systemic approach to framing a circular economy and to the products within it. The novel report sheds light on the role of the bioeconomy and the circularity aspects of bio-based products.

Calls/ Bioeconomy capital

ProESOF call for proposals. Deadline February 2020

The call for proposals are launched by the TESI Local Programme Committee and is aimed to collect ideas, to support the development of initiatives which will enhance dissemination, education, networking, training from now on to 2020.

The Euroscience Open Forum (ESOF) is the largest interdisciplinary science meeting in Europe that offers a unique framework for interaction and discussion for scientists, innovators, policy makers, entrepreneurs and the general public.

Within the proESOF call, it is possible to submit proposals that fit in a big international programme of events on natural, social sciences and humanities and on science & society relationships, such as conferences, seminars, round tables, cultural events, etc. The projects will be evaluated every 3/4 months.

Cooperation Programme – Central and Eastern Europe and Baden-Württemberg. Deadline 9 November 2018

The Programme European Cooperation for Future-Oriented Science and Education is focused on improving the knowledge base in research and innovation through mutual learning and to increase participation in excellent EU research and innovation activities. The programme will enable the participants from the EU-13 states and the partner countries of the Strategy for the Danube Region to gain insight into the higher education and research environment in Baden-Württemberg and to establish or deepen their relationships with partners from Baden-Württemberg.

The cooperation programme will take place in Baden-Württemberg from 5th to 9th November 2018, whereby the application must be submitted electronically to Baden-Württemberg International by 16th July 2018.
