Keynote: **BERTIL ANDERSSON**

President of Nanyang Technological University, Singapore

Discussants: **HENRIETTA EGERTH (FFG)**

GEORG SCHNEIDER (IST Austria)

Success breeds Success. Experiences from Singapore

PROGRAMME

10:30 Get-together

11:00 Welcome by Barbara Weitgruber (BMWFW)
Introduction by Michael Stampfer (WWTF)

Keynote by Bertil Andersson
(Nanyang Technological University, Singapore)

Discussion and inputs by
Henrietta Egerth (FFG) and
Georg Schneider (IST Austria)

The event addresses Singapore's research system and discusses its catching-up process regarding industrialization as well as its development towards a knowledge-based society. Through large public investments, Singapore evolved from an innovation follower to an innovation leader (both high-tech industry and excellent research). The preconditions for such a development shall be highlighted at the event.

Presentations and discussion will be in English language. Please register at office@fteval.at

This event is part of a series which compares the Austrian innovation system with foreign examples. Since 2010, Switzerland, Germany, Sweden, France, Catalonia, Denmark and the United Kingdom have been subject to high-ranking presentations. The series is organized by the Austrian Platform for Research and Technology Policy Evaluation in cooperation with the Vienna Science and Technology Fund (WWTF) and the Austrian Federal Ministry of Science, Research and Economy (BMWFW).
